List is updated.

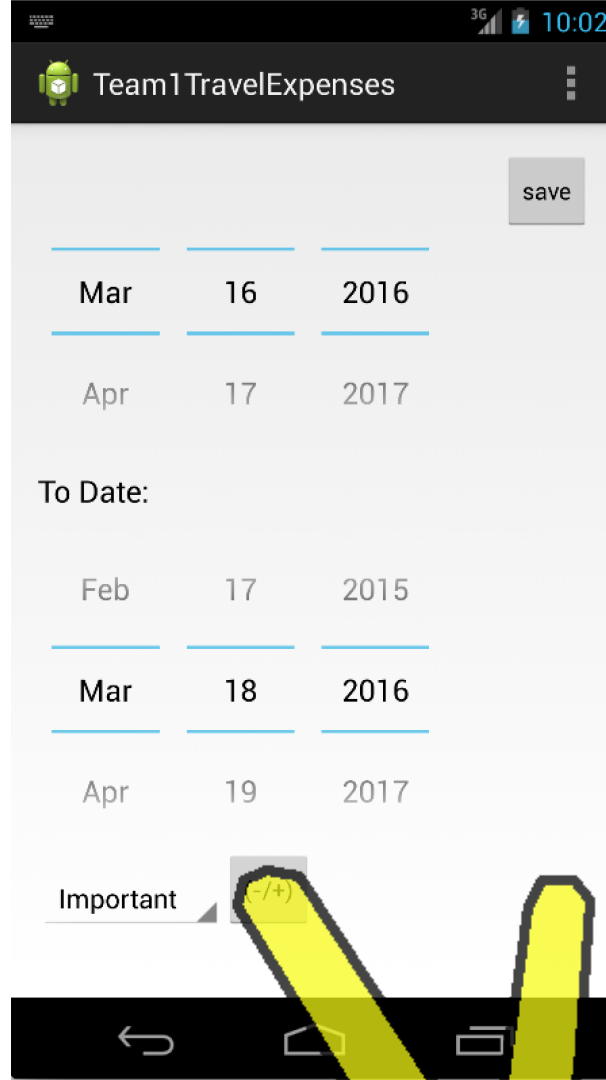

User scrolls down, then selects “from date” and “to date” on date spinner.

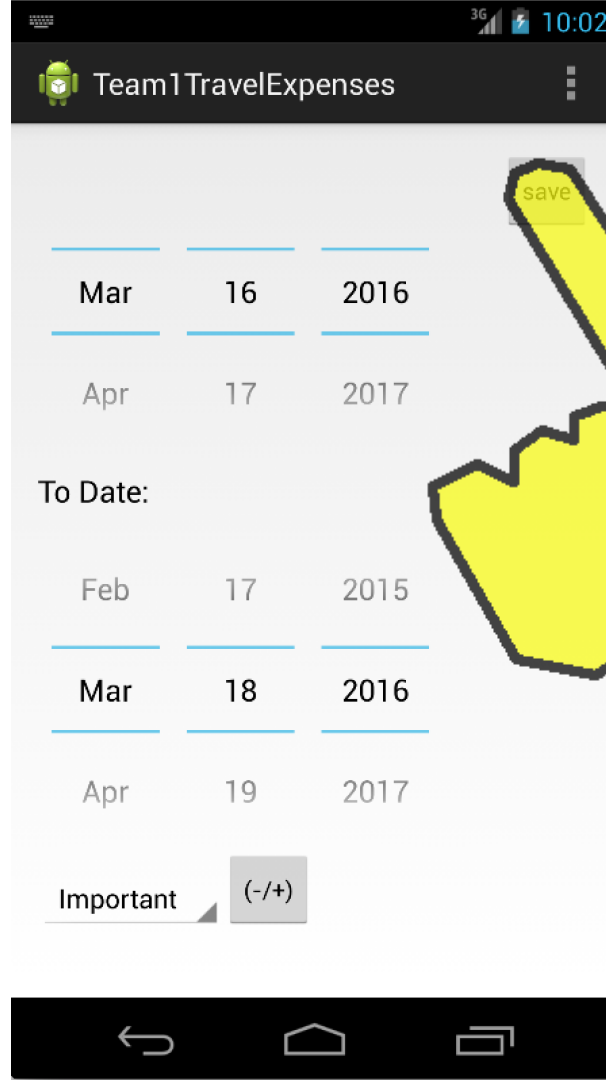

Selects "important" tag on tag spinner and hits add/remove tag button to add that tag to the claim.

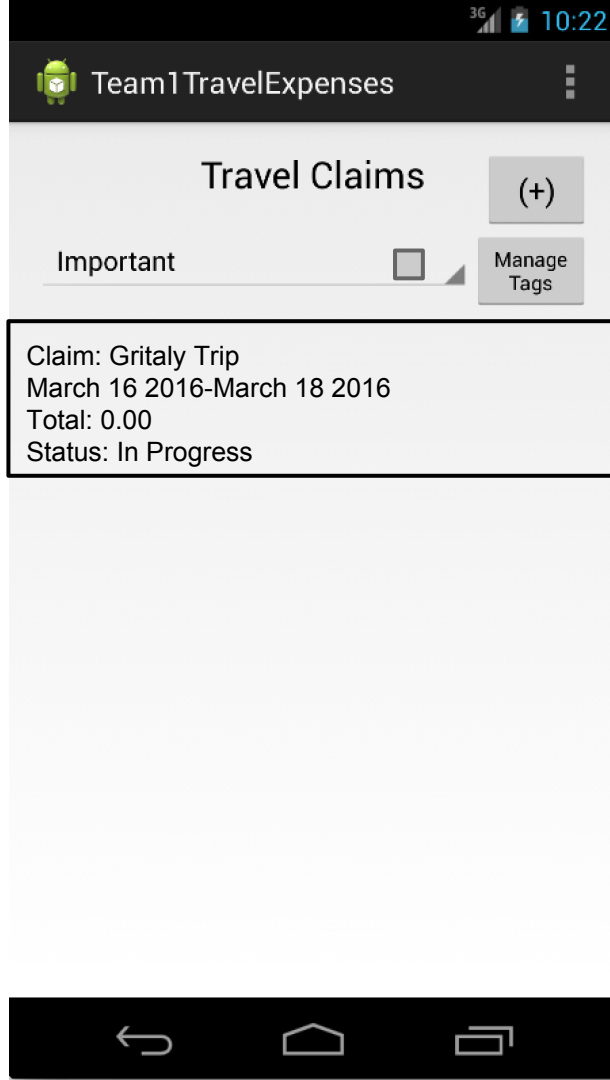

Important tag shows up in list of tags below.

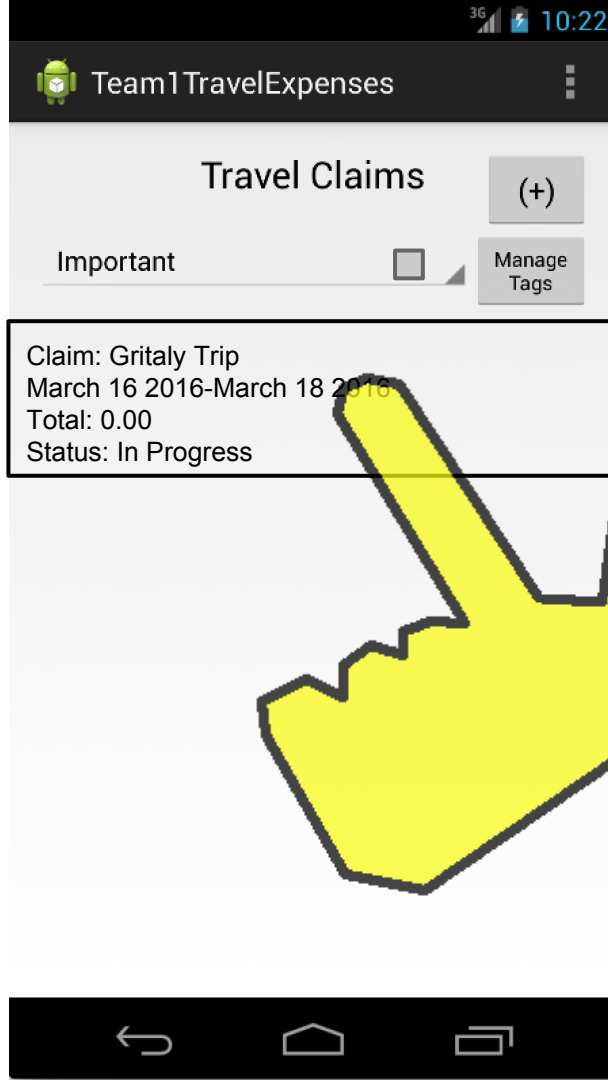

User decides claim isn't important after all and removes that tag by hitting add/remove again.

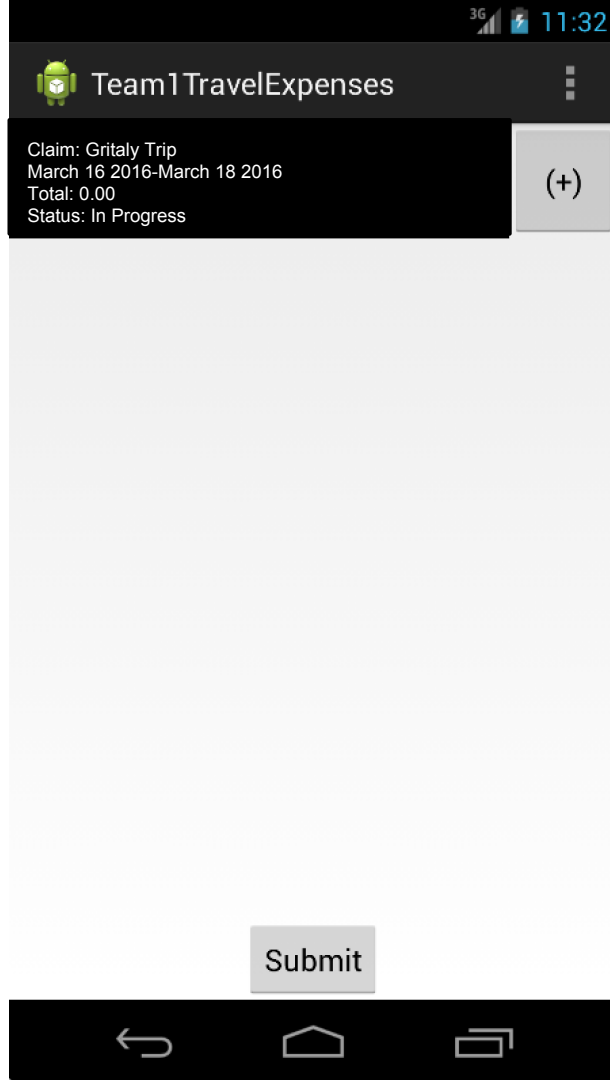

User hits save button to store the newly created claim. Note: hitting back would have the same effect

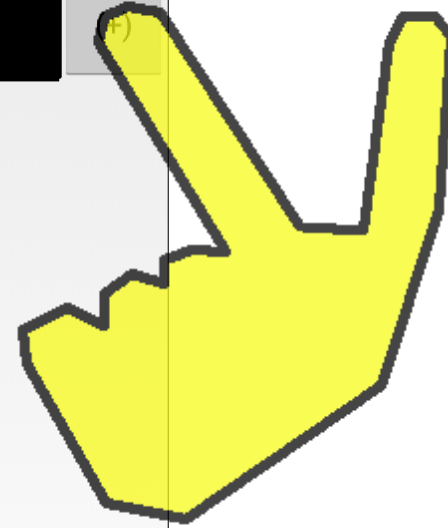

User is returned to claims list menu,
newly created claim is added to list.

User clicks on claim to open expenses list for that claim.

Expense list (currently empty) for selected claim is displayed.

User clicks add expense button to add a new expense item to the claim.

User fills in information for expense, (in this case choosing not to mark as incomplete and not to include a receipt) and hits save.

System Displays claim info screen,
updated with the additional expense.

User hits back button to return to claims list menu.

Claim has been updated to reflect added expense.
